

GEORGETOWN DELTAWAVE SYNTHETICS STRATEGIES

OVER 5 & UNDER 4 STRATEGY (D-CIRCLES)

OVER 5 STRATEGY WORKING 83%

- ❖ Make sure 3 or more losing digits: 0,1,2,3 or 4 are below 10%
- ❖ Make sure if there is 1 losing digit that is above 10% is not increasing in percentage. It should be constant
- ❖ The red bar should be on the losing digits and constant and below 9%
- ❖ The green bar, 2nd digit after the green bar and the 2nd digit after the red bar are on the winning side...between 6-9
- ❖ Make sure the green bar is on the winning digits and gaining momentum not fading or constant (8 or 9) for over 7
- ❖ Make sure the winning digits are increasing in percentage and constantly/frequently touched by the cursor

ENTRY MODEL

- Wait for digit 0,1 or 2 to appear 3 or more times consecutively then run your bot (USE DELTAWAVE SPEEDBOT FOR TIMING)
- If there is a consecutive touch of the over digit, then use digit 1 or 0 as your entry

N/B: MAKE SURE YOU HAVE A GOOD INTERNET FOR A SMOOTH TRADING TO AVOID SKIPPING DIGITS

The strategy is tested and working
